Series Title: Climate Change – Our Responsibility

Curriculum Area: Science, Social Studies

Grades: 9-12

of Programs/Length: 1/25 minute program

This program establishes the vital importance of the greenhouse effect for life on Earth and then presents a balanced argument to assess whether or not anthropogenic climate change (often called global warming) is in fact taking place. Clear arguments are presented on both sides of the debate and illustrations given covering both more economically developed countries and less economically developed countries, with impacts and responses fully explored. A thorough and balanced examination of this important and often contentious issue.
